THE FLEXIBILITY TO SEIZE OPPORTUNITIES

With the dust settling on this week's British Ecological Society's 2011 annual meeting, it seems a good idea to draw together the early careers advice from various workshops, evening events and academic talks.

CHANGING GOVERNMENT POLICY FROM THE GROUND UP

The 2012 BES annual meeting is up and running at the University of Sheffield. At the time of writing the room is filling up for the "unlocking your potential" early career researcher event, ahead of the by now traditional Warblefly ceilidh and sessions on using new media to publish science in the online age

NEXT-GENERATION ECOLOGISTS AND OPEN DATA

The next generation of ecologists have the opportunity to affect a shift in the culture of ecology. The shift that we need is to make ecology open.

Time to build the community:

INNGE has Launched

Welcome

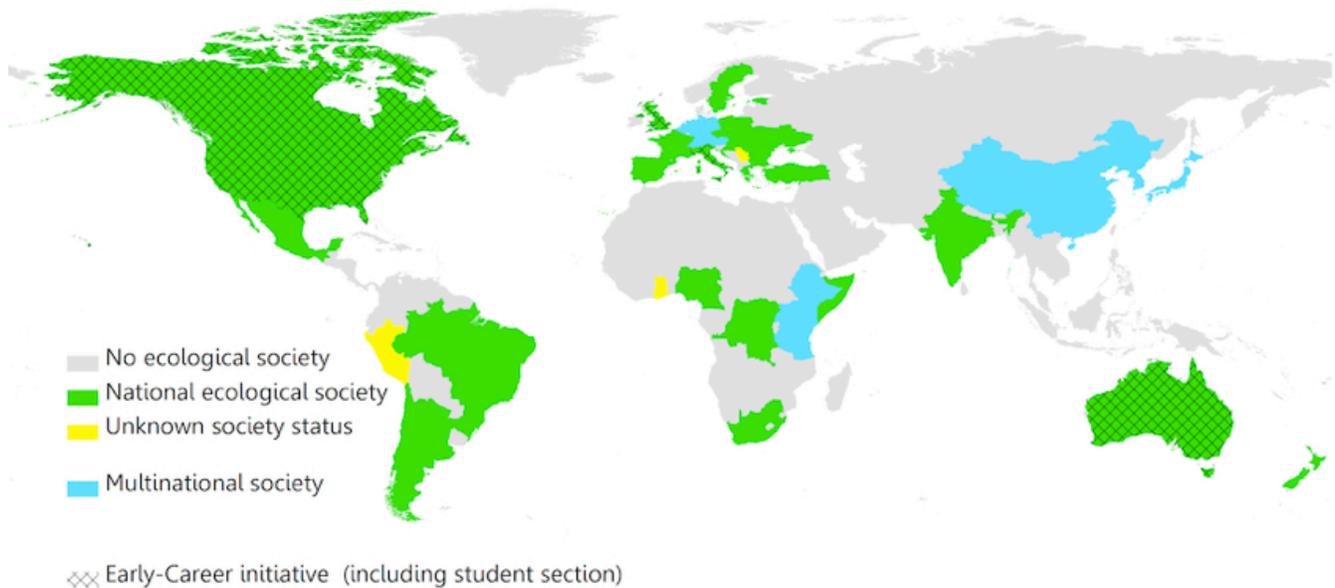

We want to warmly welcome everyone reading this newsletter. Since INNGE was launched in June 2011, early-career ecologists from across the world have joined the international community online. Our Facebook group recently surpassed 200 members, we have built active contacts to more than 10 ecological societies, and the INNGE.net list-serve now has several hundred subscribers. The newsletter is our most recent initiative to reach out to the next generation of ecologists, and we hope you will share it with colleagues at your school, work place, in your society, or in your local network.

Get together at your conference

One way to build an international community of early-career ecologists is to meet at conferences and share ideas and experiences with your colleagues. INNGE encourages spontaneous meet-ups at the next conference you're going to. Use our Facebook page, the Twitter hashtag #INNGE or the email list to announce a meet-up.

INNGE in India

Shortly after the launch of INNGE the announcement was posted to the YETI list-serve in India. This immediately generated a flow of emails from early-career ecologists in India and has sparked the first thoughts on establishing an early-career network in India. It is our hope that this will start to materialize through the coming weeks and months. For any info regarding INNGE in India contact Vincent Bonhomme (bonhomme.vincent at gmail.com)

THE ECOLOGY WORLD MAP

With this map we try to keep track of the planet's ecological societies. In addition to the societies indicated on the map, recent initiatives have been taken to launch and relaunch ecological societies in Norway and Iceland. If you are looking to get in contact with a society but have a hard time finding the contact information please don't hesitate to contact us.

The online community is alive

Current Activities at INNGE.net

We are constantly trying to add more activities at INNGE.net. The French Ecological Society has kindly offered to host the website on their server – we thank them for this helping hand.

Forums

Discuss issues important to early-career ecologists from your region on our Regions forum. Looking for an international post-doc? We've compiled a list of resources for you to explore. Please add other ones you are aware of: [Resources for Finding an International Postdoc](#)

Wiki

Contribute and explore a collection of suggested R-packages for different ecological sub-disciplines: [Open Source Ecology Resources for R](#)

Project Showcase

In this part of INNGE.net you can read about activities of early-career groups in other ecological societies, and get inspiration for your own network. Current stories include:

British Ecological Society [BES Early Career Initiatives](#)

Ecological Society of America [ESA Deepwater Horizon Oil Spill Data Collection](#)

PARTNERS:**FIGSHARE**

We are excited to announce our partnership with FigShare an INNGE open-source partner. FigShare allows scientists to share not just their data, but also figures and other media (e.g., videos) in a social way.

FigShare is in the midst of a site overhaul, but we are looking forward to engage INNGE further in this partnership. Keep an eye on the FigShare and INNGE blogs for news on our exciting partnership.

The FigShare logo is displayed in a light blue and green color scheme. The word "Fig" is in light blue and "Share" is in light green, both in a sans-serif font.**JOIN INNGE
